**UNITED<sup>®</sup>**  
Fasteners

# We provide the necessary technical support, from project design to project implementation.

We have the capabilities to supply fastening solutions that meet your specified requirements and budget parameters. Our technical teams have the qualifications, experience and expertise to provide fastening solutions that meet your timelines and remain cost-effective.

We specialise in drawing parts, whether CNC machined, cold-forged, hot-forged, milled, stamped, punched and/or assembly parts.

Our technical teams help ensure products comply to the required specifications or performance requirements.
